

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner contacts applicant representative, Mr. Robert Griffith to discuss the 112 problem, which arises by the amendment such as "...if the user request and the one or more stored graphical examples are inadequately similar." Mr. Griffith agrees with the examiner and amend the claim such as "if the user request and the one or more stored graphical example are similar, searching for at least one matching graphical example among the one or more graphical examples for the user request; if the user request and one or more stored graphical examples are not similar...and searching for at least one matching graphical fragment among the one or more graphical examples for the user request." to over come the 112 problem. Mr. Griffith authorizes the changes to be made in the examiner amendment.
